

PRINSHA KHADKA

+977-9865265076 | prinshakhadka36@gmail.com | linkedin.com/in/prinsha-khadka | github.com/Prinsha36

Education

SAMRIDDHI COLLEGE, Lokanthali, Bhaktapur Graduated Jan 2026
Bachelor of Computer Application (BCA)
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management, Web Technologies

Experience

TECHYATRA LABS PVT. LTD. Santinagar, Kathmandu
Backend Developer (Python & Django) Jan 2025 – June 2025

- Designed scalable backend systems using Django and Python, supporting 10,000+ concurrent users.
- Built RESTful APIs with Django REST Framework (DRF) for seamless data exchange between services.
- Architected microservices using Spring Boot and integrated third-party APIs to improve system reliability.
- Implemented JWT-based authentication and authorization for secure user management.
- Contributed to a School ERP system automating student management, attendance, grading, and finance modules, centralizing data and reducing manual administrative workload.

UXQCODE 2025 August - 2025 November
QA Intern

- Developed RESTful APIs using Python and Django, improving API response time by 30%.
- Optimized database queries, reducing application load time by 40%.
- Collaborated with cross-functional teams following Agile development methodologies.
- Implemented authentication and authorization systems using JWT.

Additional Information

PROJECTS

Face Detection & Gender Classification System github.com/Prinsha36/Face_Detection
Python, OpenCV, Deep Learning

- Built a real-time computer vision application that detects faces and classifies gender from images and video streams.
- Integrated deep learning-based prediction model with real-time processing; achieved 90% classification accuracy.

E-Commerce Web Application github.com/Prinsha36/-Django-E-commerce
Python, Django, HTML/CSS

- Developed a full-stack platform with product display, shopping cart, payment gateway, and user authentication.
- Improved user engagement by 25% through performance and UI/UX optimizations.

Hospital Readmission Prediction — Diabetic Patients github.com/Prinsha36/Diabetes
Python, Scikit-learn

- Built predictive ML models using feature engineering and scaling; evaluated with precision, recall, and F1-score.

Newspaper & Blog Platforms github.com/Prinsha36/News-Portal | github.com/Prinsha36/blog-project
Django, Python, HTML/CSS

- Built a news portal (article browsing, search, category filtering) and a blog platform (posting, commenting, interaction).

Book Scraping Tool github.com/Prinsha36/Book_scraping
Python, BeautifulSoup, Requests

- Scraped book metadata (title, author, price, ratings, availability) from online stores; stored results in CSV and database.

CLI User Management Tool github.com/Prinsha36/sqliprject
Python, SQLite

- Built a menu-driven CLI tool for CRUD operations on an SQLite database for user record management.

Skills

Technical: Python, Django, Django REST Framework, JavaScript, React, Node.js

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, Docker, AWS, Linux, Postman

AI / ML & Data: Scikit-learn, TensorFlow, Keras (Deep Learning), Gen AI, Pandas, NumPy, OpenCV, BeautifulSoup, Matplotlib

Testing: Playwright (Automation Testing), QA Manual Testing

Concepts: REST APIs, Microservices, OOP, Data Structures & Algorithms, JWT Authentication, Web Scraping

Languages: Nepali (Native), English (Professional), Hindi (Conversational)

Certifications

AI + Data Engineer

Leroy AI Company, Anamnagar, 2026

Certified in AI and Data Engineering, covering data pipelines, machine learning workflows, and AI-driven application development.

Python with Django

Broadway Infosys, Tinkune, 2024

Completed in-depth training from basics to advanced level with hands-on project assignments.
